Mohendran K M

Senior FullStack Developer

My Self

I have almost 8 years of experience working as a Full Stack Developer. I have good knowledge in Angular, React and Node. I also have experience managing and collaborating with cross-functional teams including product, design, and engineering.

My curiousity and passion for technology helps me to learn and grow in to a T-shaped person. I strongly believe that "Every artwork is just some brush strokes away from becoming a Masterpiece" and I apply this philosophy to continiously improve

Work History

Happyfox

Front End - Senior Frontend Developer — Jun 2023 - Aug 2024

Calibraint Technologies

Front End - Tech Lead — July 2016 - April 2023

My Experience

- **Product Ideation - 1 year:** At Happyfox, I would discuss with stakeholder to ideate, wireframe and code the product features. In my side venture, DealAmigo, I worked with Leads to bring the Product to Market
- **Product Owner - 1 year:** I was responsible for developing a comprehensive Requirement Document for a CRM Product that outlined the Product vision, scope, features, and user stories. I delivered engaging and informative Product Demos to potential Leads and demonstrated the value proposition of the Product.
- **Angular Developer - 5 years:** I consider myself an Angular expert, working with Angular for almost 5 years with an understanding of Change Detection and SOLID Principles.
- **React Developer - 4 years:** I have worked with React using Class & Functional Components and used Redux Toolkit for State Management
- **JS Architect:** As I have good experience working with React and Angular, I take this role to establish the Tech Stack and Guidelines for the projects.
- **Tech Lead - 3 years:** I have configured EsLint, SonarLint to help my team create good quality code. Also I setup initial codebases, perform code reviews and write unit tests to reduce technical debt in my projects.
- **Node js Developer - 2 years:** I have worked on Express Js with MongoDb, I also have experience working on Supabase and Firebase for my Side Projects. For deployment, I have used Vercel, Firebase, Digital Ocean and AWS.

My Own Hobby Projects

DealAmigo

Helps Sales People to Track their Sales Collateral — Sep 2024 - Nov 2024

- I coded this platform from scratch and took this product to Market. It is still in the validation stage. Until I get validation from this Product, It is on Hold.
- It is a Digital Sales Room (Sales Enablement Platform) that helps Account Executives to focus on the Deals that Matter Most. It notifies the Sales Exec, when the leads opens the DealRoom.
- I onboarded 2 Businesses.
- Website: https://www.dealamigo.io/

Summr.io

Chrome Extension + OpenAI Api Integration — Jan 2023 - Feb 2023

- I created a Chrome Extension, that helps Medium Blog users to summarize the blog, so that it would be easier for them to consume content.
- It has about 66 Active Users
- Website: https://www.summr.io/
- Chrome Extension: https://chrome.google.com/webstore/detail/medium-blog-digest/fhohcpjlbgchehjpejkdlecpafdlldfi

Passion

Startups

I attended Startup Events, Product Events and Sales Meetups.

Sales & Marketing

Im interested to learn how to sell a Product and implement GTM Strategies
